- |       |              |           |
|-------|--------------|-----------|
| • ECS | • Ansible    | • Jenkins |
| • GCP | • Terraform  | • Azure   |
| • AWS | • Kubernetes | • Pulumi  |

## Professional Experience

### Lead Infrastructure Engineer

*Company 124, Be'er Sheva | 2020 - Present*

- Lead infrastructure team of 10 engineers supporting 100+ microservices
- Architected multi-cloud strategy reducing costs by \$2M annually while improving reliability
- Designed and deployed Kubernetes platform serving 500+ developers across 3 regions
- Established SRE practices including SLO frameworks, error budgets, and on-call rotation
- Led migration from legacy data center to AWS/GCP hybrid cloud over 18 months
- Implemented infrastructure automation reducing provisioning time from days to hours
- Drove adoption of GitOps and infrastructure-as-code across engineering organization
- Mentored senior and mid-level engineers, conducted technical interviews

## Senior DevOps Engineer

*Company 011, Tel Aviv | 2017 - 2020*

- Led DevOps transformation initiatives for enterprise clients
- Built CI/CD pipelines and infrastructure automation for Fortune 500 companies
- Designed AWS and Azure architectures for high-availability applications
- Implemented monitoring and observability solutions

## DevOps Engineer

*Company 365, Kfar Saba | 2014 - 2017*

- Built AWS infrastructure from scratch for early-stage startup
- Implemented CI/CD pipelines using Jenkins and Docker
- Managed production systems and on-call responsibilities

## Education

---

### M.Sc. in Computer Science

Tel Aviv University | 2012 - 2014

### B.Sc. in Computer Engineering

Technion | 2008 - 2012

## Certifications

---

- Google Cloud Professional DevOps Engineer (2022)

## Languages

---

Hebrew (Native), English (Professional)
