Bridger McCormick

Lead Infrastructure Engineer

bridger.mccormick@email.com | 060-7079759 | Petah Tikva, Israel | github.com/bridgermccormick | linkedin.com/in/bridger-mccormick

Lead Infrastructure Engineer with 10+ years of experience architecting and operating large-scale cloud infrastructure. Expert in multi-cloud strategies, infrastructure automation, and building high-performing engineering teams. Track record of leading infrastructure modernization initiatives and establishing DevOps practices in enterprises. Strong technical leadership combined with hands-on execution capabilities.

TECHNICAL STACK

Technologies: PowerShell, Ansible, GCP, Go, Terraform, Azure, Docker Swarm, AWS, Kubernetes, Pulumi

TECHNICAL SKILLS MATRIX

Architect multi-region, multi-cloud infrastructure serving millions of users with 99.99% availability

Lead infrastructure modernization from on-premise data centers to cloud-native architecture

Design and implement Infrastructure as Code practices using Terraform, Ansible, and GitOps

Build and mentor high-performing infrastructure teams of 8-12 engineers

WORK EXPERIENCE

Lead Infrastructure Engineer
Company 165 - Ra'anana
2020 - Present

- Lead infrastructure team of 10 engineers supporting 100+ microservices
- Architected multi-cloud strategy reducing costs by $2M annually while improving reliability
- Designed and deployed Kubernetes platform serving 500+ developers across 3 regions
- Established SRE practices including SLO frameworks, error budgets, and on-call rotation

- Led migration from legacy data center to AWS/GCP hybrid cloud over 18 months
- Implemented infrastructure automation reducing provisioning time from days to hours
- Drove adoption of GitOps and infrastructure-as-code across engineering organization
- Mentored senior and mid-level engineers, conducted technical interviews

Senior DevOps Engineer
Company 016 - Tel Aviv
2017 - 2020

- Led DevOps transformation initiatives for enterprise clients
- Built CI/CD pipelines and infrastructure automation for Fortune 500 companies
- Designed AWS and Azure architectures for high-availability applications
- Implemented monitoring and observability solutions

DevOps Engineer
Company 210 - Tel Aviv
2014 - 2017

- Built AWS infrastructure from scratch for early-stage startup
- Implemented CI/CD pipelines using Jenkins and Docker
- Managed production systems and on-call responsibilities

EDUCATION

M.Sc. in Computer Science
Tel Aviv University | 2012 - 2014

B.Sc. in Computer Engineering
Technion | 2008 - 2012

CERTIFICATIONS

→ Google Cloud Professional Cloud Architect (2021)
→ GitLab Certified CI/CD Specialist (2021)
→ Certified Kubernetes Administrator (CKA) (2023)
